

SOLARIOUS

Energy-Backed Blockchain Infrastructure

THE PROBLEM

Mining is perceived as energy waste, not value creation

Disconnected from physical economy

\$2T+ market driven primarily by speculation

No real-world anchoring

Inflationary token systems

THE SOLUTION

Solarious Introduces Proof-Of-Energy (PoE)
We Convert Energy Into A Financial
Primitive, Securely.

SOLARIOUS IS A LAYER-1 BLOCKCHAIN WHERE:

1

Real-world
energy becomes
a consensus
mechanism

2

Infrastructure-
backed
blockchain

3

Verified by
decentralized
network of
Validators

4

Tokens from real
energy
production

UNFAIR ADVANTAGE

Energy > Infrastructure > Token Value

VALUE SCALES WITH ENERGY

SUPPLY TIED TO INFRASTRUCTURE

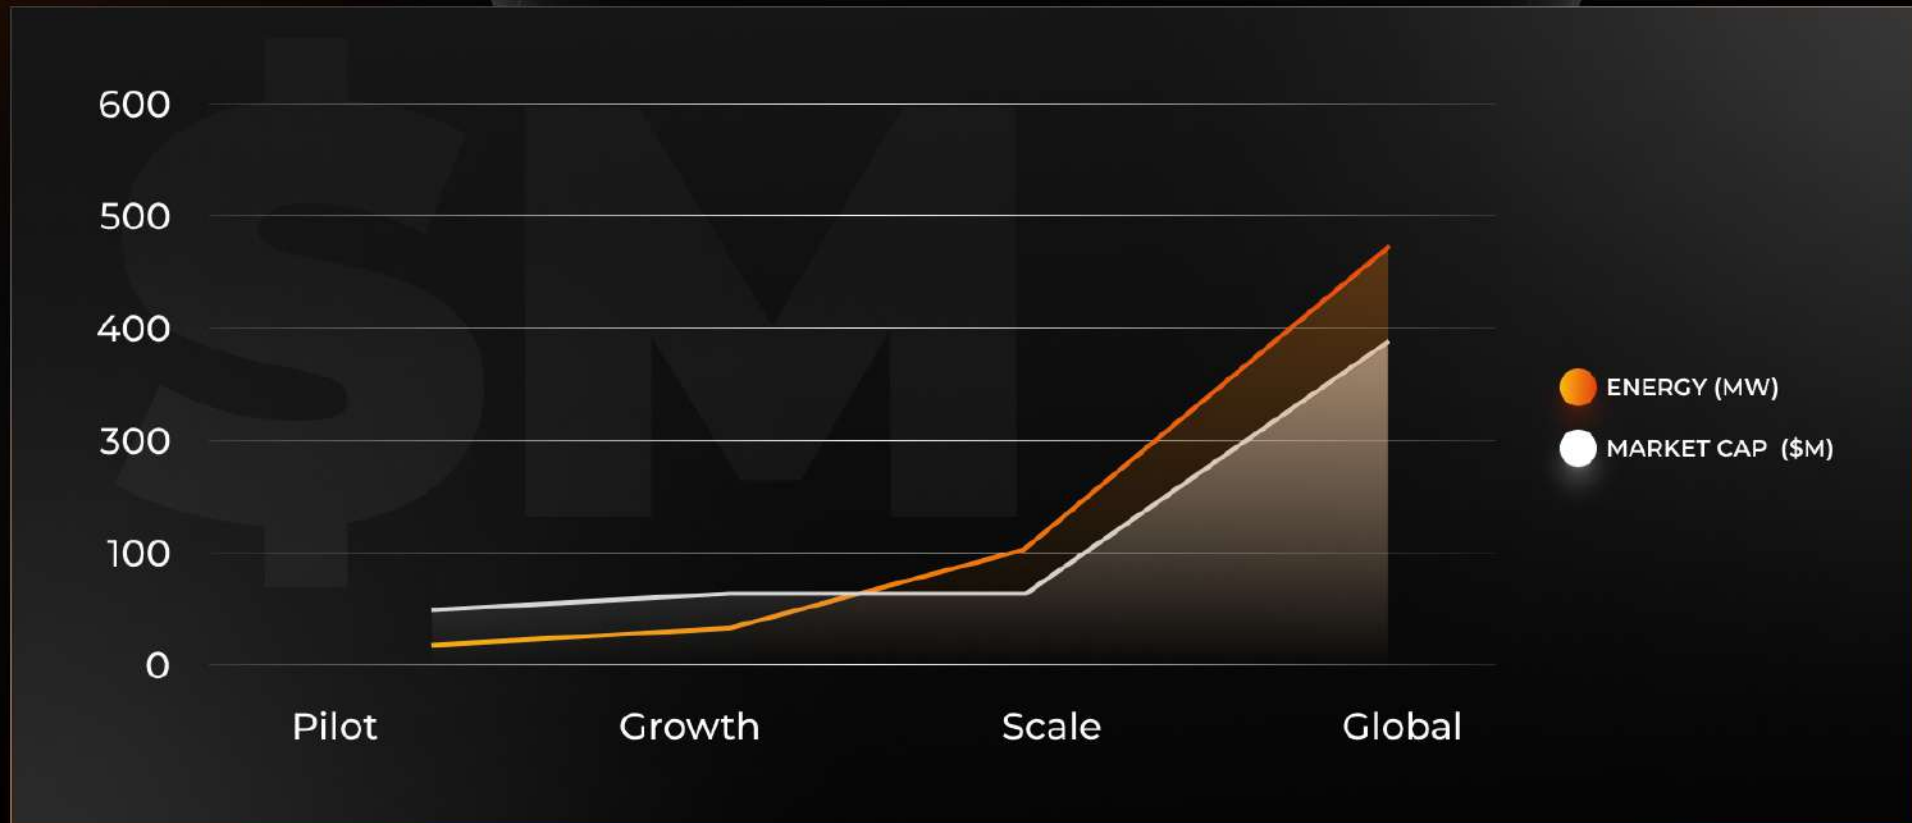

PROOFS ARE VALIDATED ON-CHAIN

DEMAND FROM REAL USAGE

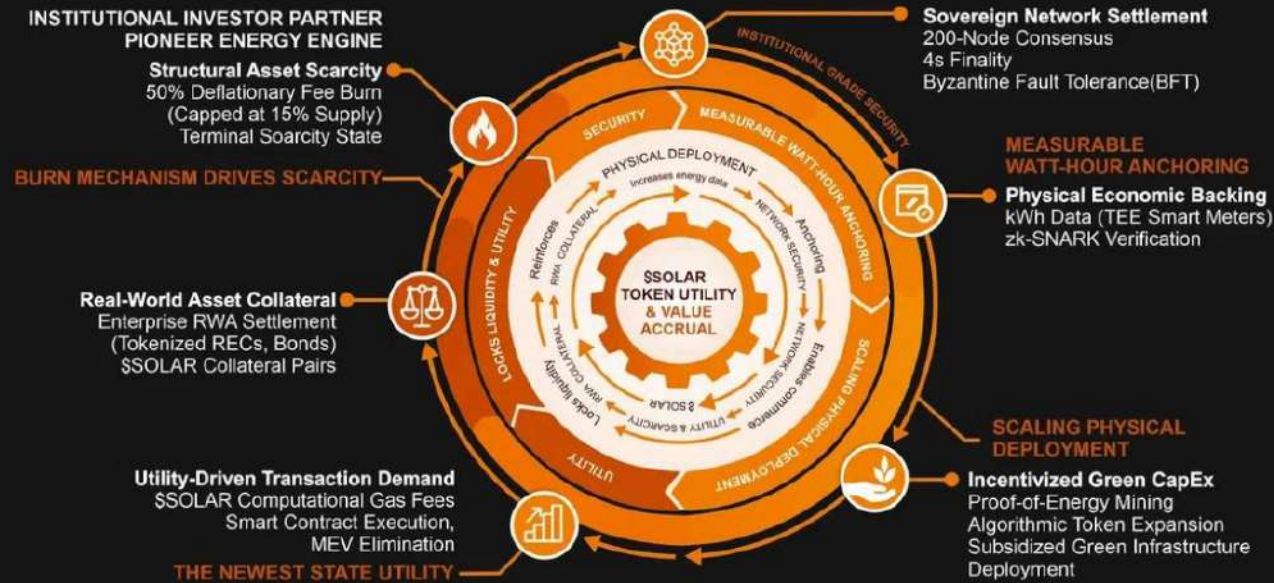

MARKET

Energy > Market Cap > Token Value

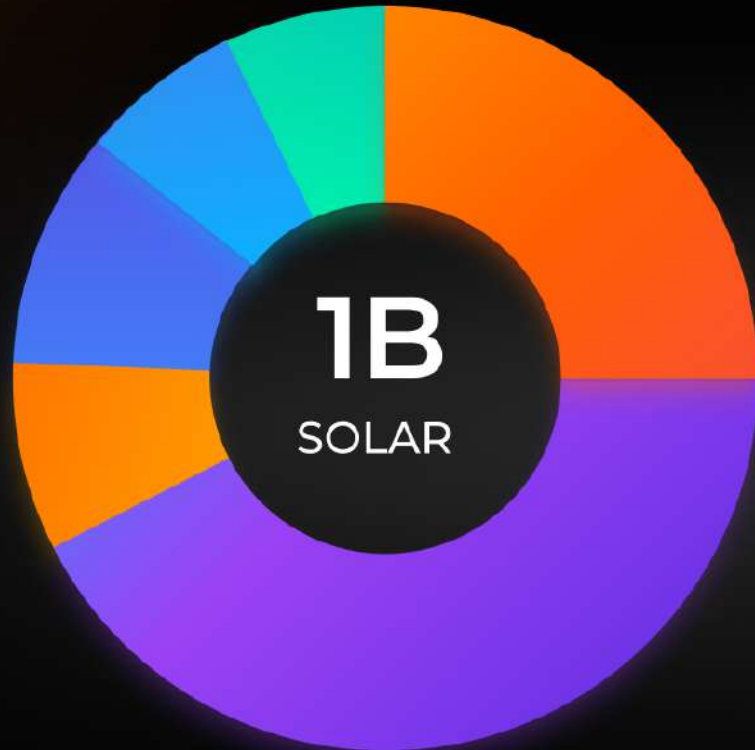

MODEL

THE UNIFIED SOLARIOUS ECONOMIC FLYWHEEL : stakeholders, utility, and value accrual.

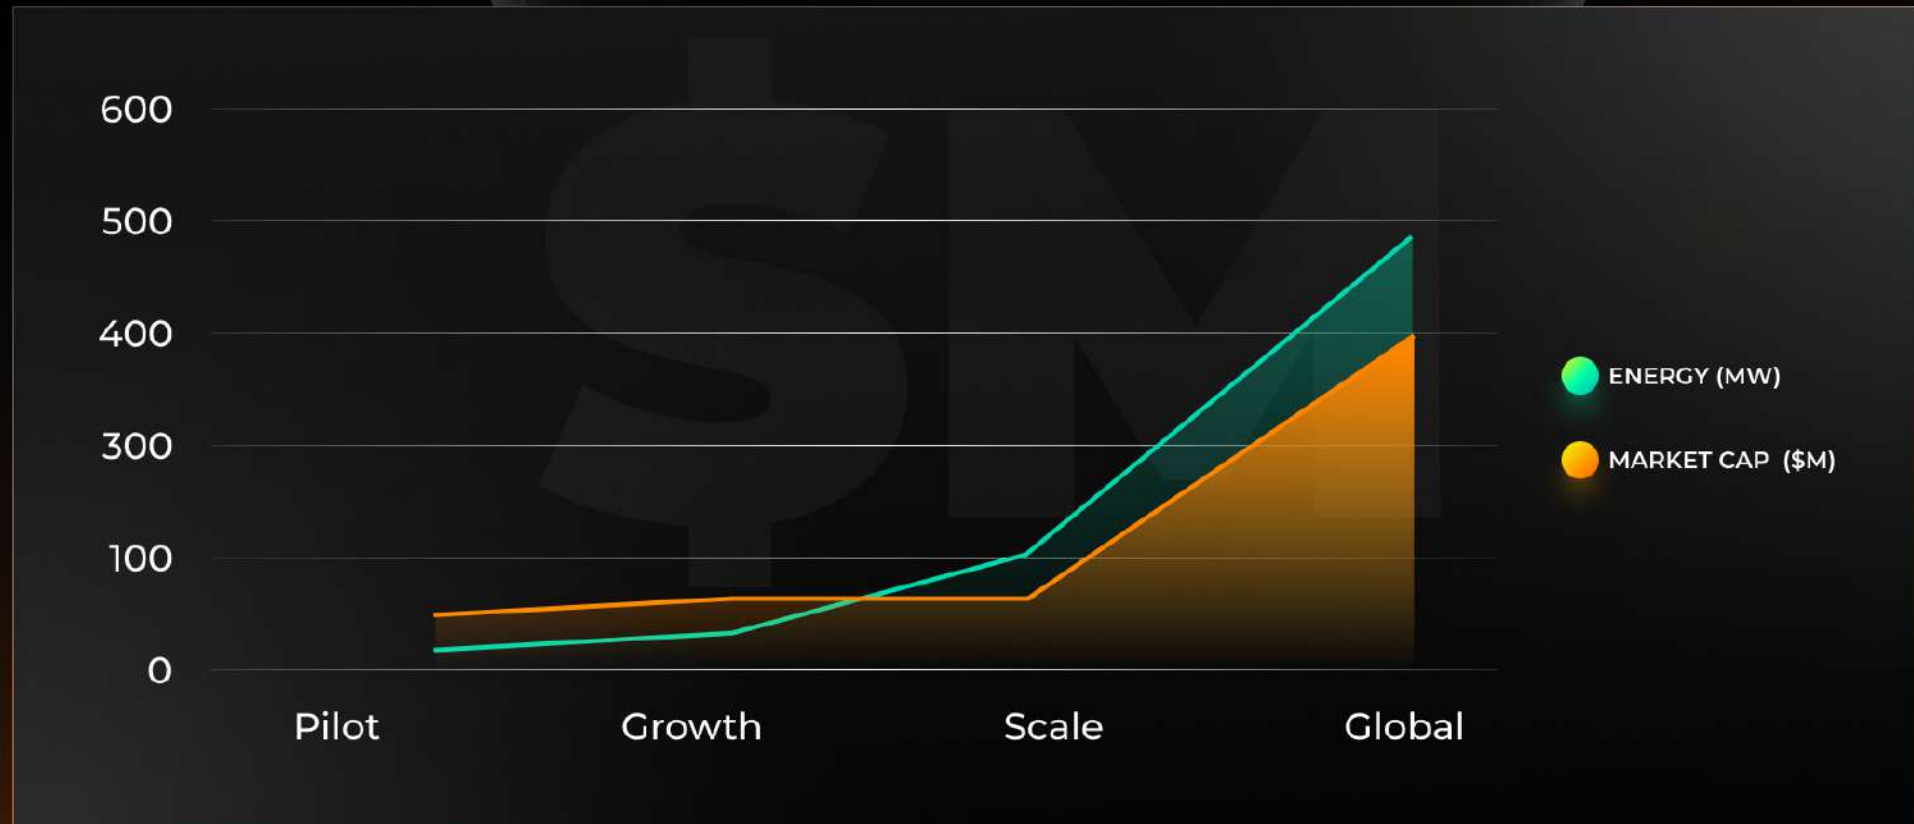

TOKEN ALLOCATION

Macroeconomic Parameters

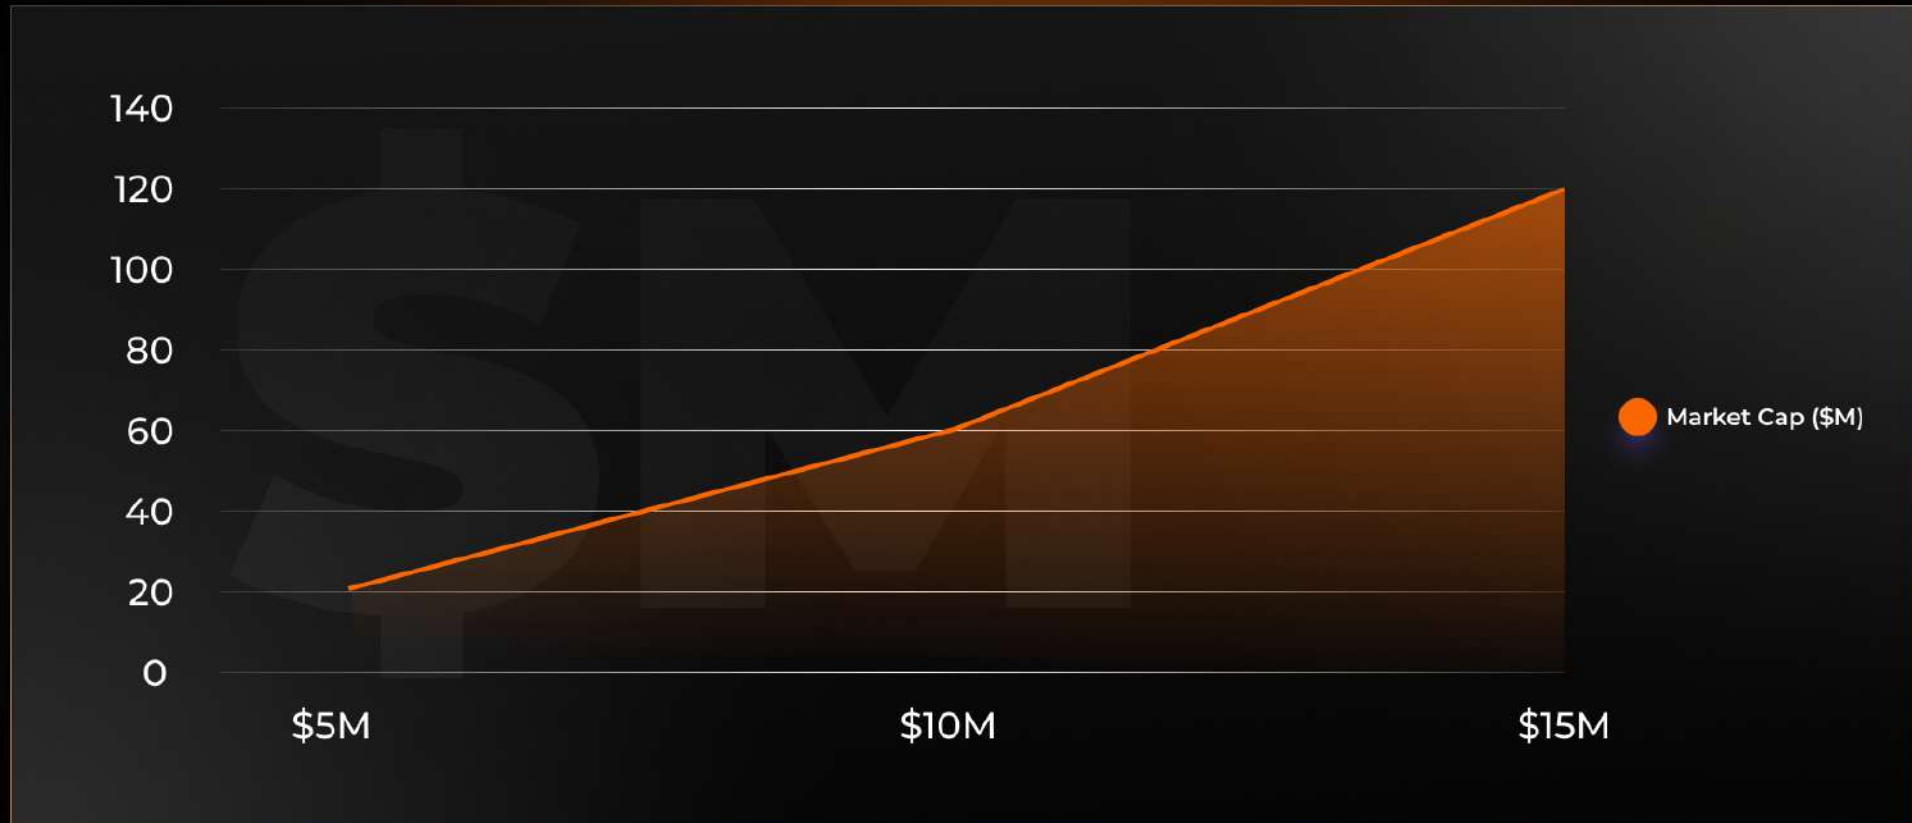

SUPPLY VS. DEMAND

Energy > Market Cap > Token Value

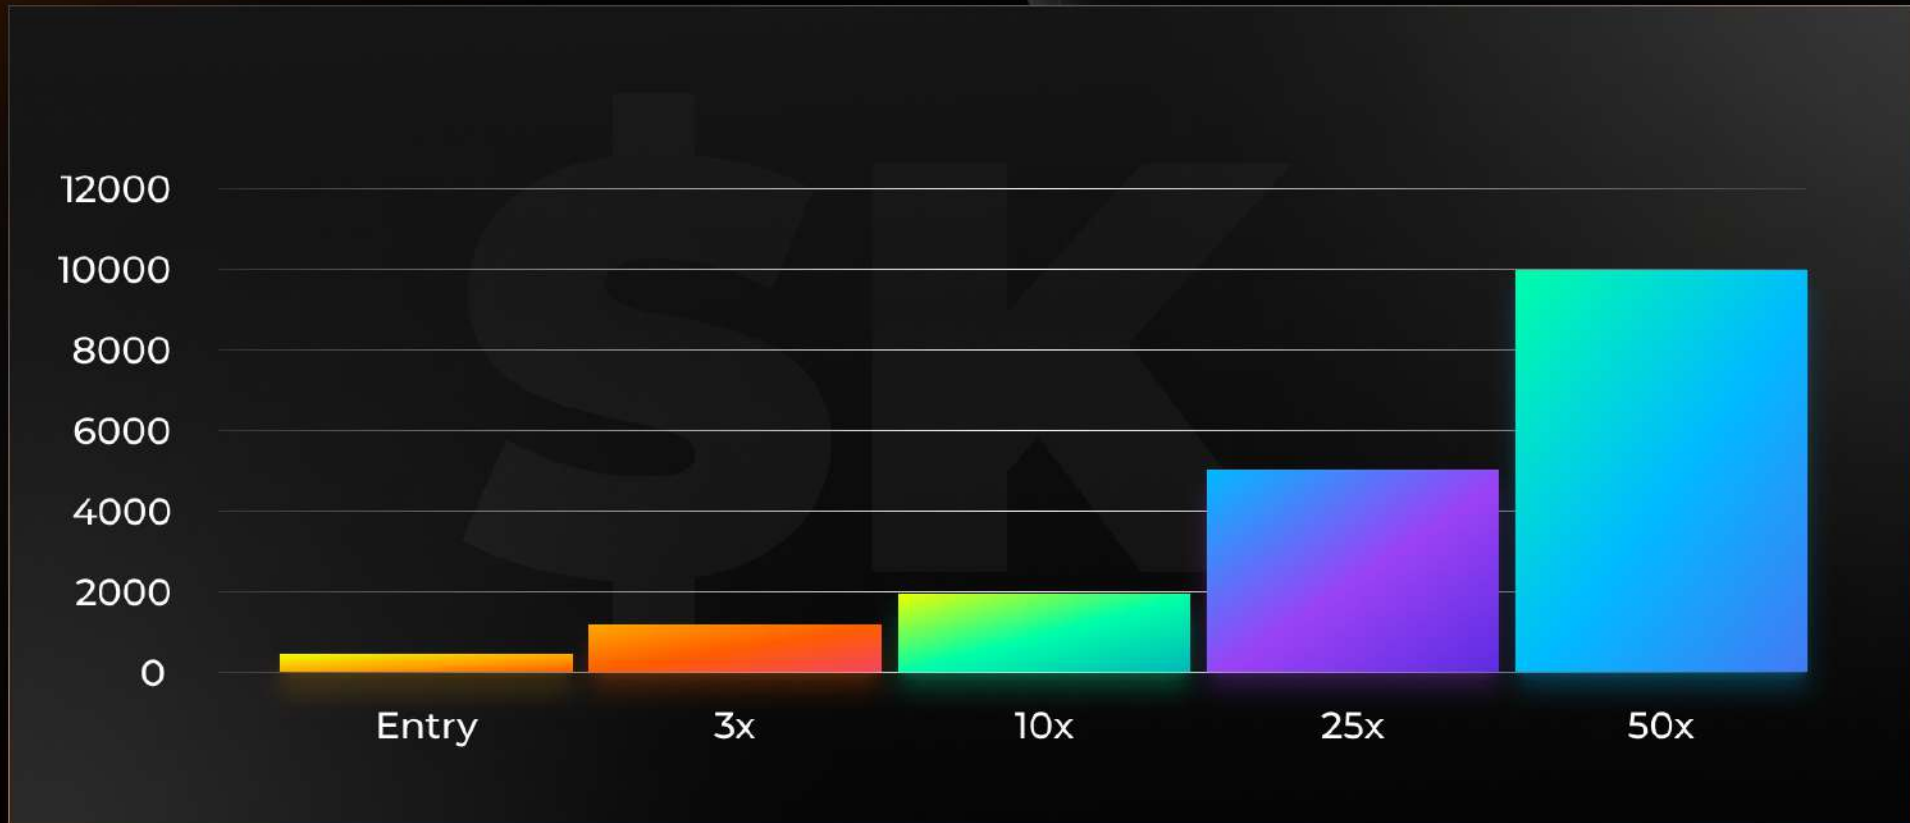

CAPITAL EFFICIENCY

Market Cap (\$M)

ROI EXPECTANCY

Value (\$K)

LEADERSHIP

Combined Experience Of 21 Professionals

GO-TO-MARKET

This Is Already In Motion

Deploy energy
infrastructure

Enterprise
partnerships

Scale usage &
liquidity

Expansion into
RWA markets
